

# Persil Professional Performance Powder

## Description

Persil Professional Performance is a Zero-P mainwash detergent formulated for use in domestic and on premise laundries. The product is a premium powder suitable for washing all white cotton and polycotton fabrics and colourfast articles. Persil Professional Performance should be manually dosed via the dispenser drawer.

## Key properties

Persil Professional Performance is an enzymatic Zero-P detergent powder, based on an effective blend of surfactants, water hardness sequestrants, anti-greying and anti-corrosion agents, alkaline salts and medium temperature bleach system.

The well-balanced surfactant blend results in excellent fatty/oily and particulate soil removal and dispersion of soil components.

The zeolite based building system ensures low water hardness ion concentration and consequently prevents precipitation of detergent components. In this way zeolites also function as anti-greying agents by preventing formation and deposition of water hardness salts onto fabric. In addition ingredients with anti-redeposition and anti-incrustation properties have been included in the product.

Persil Professional Performance has also been formulated with silicates, which function as anti-corrosion agents, and optical brightener ensuring long-lasting whiteness of fabrics.

The product contains a bleach system for application at low - medium temperatures (40 – 60 °C) and bleach stabilising agents, preventing fabric damage. The presence of proteolytic enzyme leads to protein degradation, thus facilitating removal of proteinaceous soil such as blood and food stains.

In addition the product contains cellulase, resulting in prevention of pill formation and de-pilling effects(anti-aging).

Persil Professional Performance is based on new processing technology, has excellent dispensing properties and fast dissolution.

## Benefits

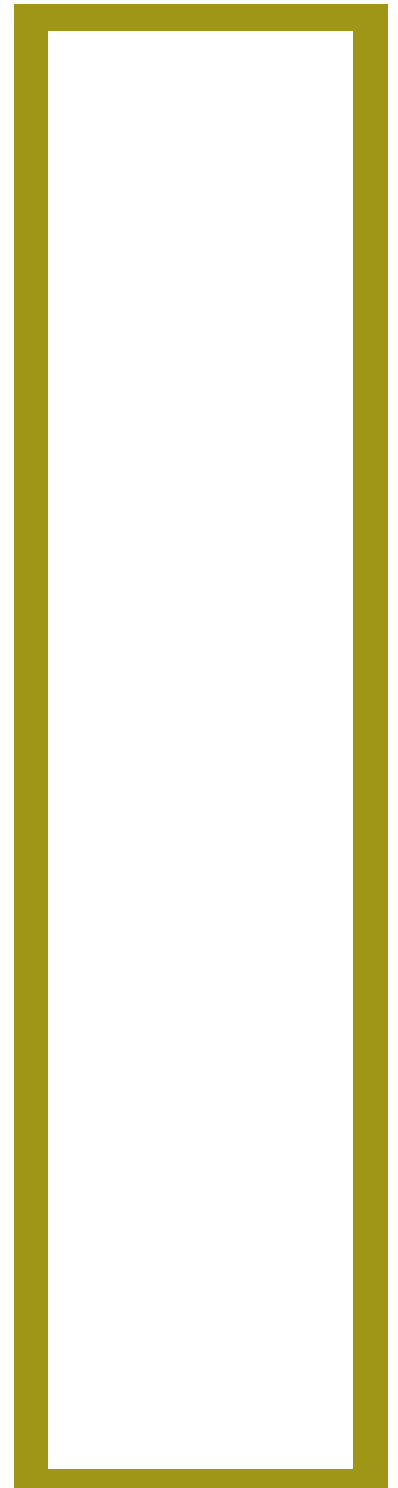

1. Excellent performance on a wide range of stains and types of soil
2. Prevents greying of fabric; stabilisation of soil particles in the wash liquor
3. Ensures long-lasting whiteness
4. Effective low - medium temperature bleaching ( minimal fabric damage)
5. Prevents corrosion of machine parts
6. Very effective on proteinaceous soil (e.g. blood and food stains)
7. Prevents pilling and has anti-aging effect(de-pilling)
8. Contains an excellent fragrance

## Use instructions

For dosage recommendation, please refer to dosing matrix on pack.

## Technical data

Appearance	White free flowing powder
Bulk Density[g/l]	657

**Safe handling and storage information**

Store in packs, away from extremes of temperature.

Full guidance on the handling and disposal of this product is provided in a separate Material Safety Data Sheet.
